

PROFILE

My name is Md Kamran Akhtar, founder and managing director of WebSolGuru, and the creator of Mera Vidyalaya—a powerful AI-driven school automation platform built for Bharat, not just India. I hold a B.Tech in Computer Science from Mewat Engineering College, Nuh (affiliated with MDU Rohtak) and come from a rural background in Bihar. I bootstrapped WebSolGuru with zero capital, now serving 1,000+ clients and 100K+ users globally. Mera Vidyalaya offers face-recognition attendance, predictive analytics, and ERP tools. We serve 185+ schools, 6,700+ students, and are onboarding 900+ govt schools in Haryana. My mission is simple—to ensure no rural school is left behind due to lack of technology or money.
